Few points about the venue, FFPW USB and CENAKVA:

The **historic town of Vodňany** was appointed a royal town in 1336. Later the town became famous as one of the centres of South Bohemian fishing. Nowadays it has more than 6 500 inhabitants and creates a nice mix of the magical ambiance of a traditional fishing town and a modern scientific environment.

Unique **Faculty of Fisheries and Protection of Waters** USB was established in 2009 and since then has continued in a tradition of research of the Research Institute of Fish Culture and Hydrobiology, which was established in 1921.

**South Bohemian Research Center of Aquaculture and Biodiversity of Hydrocenoses (CENAKVA)** is an open institution that serves as a unique centre of knowledge, science, services, and education in the field of fisheries and water protection. The establishment of the research infrastructure CENAKVA is linked to the beginning of the year 2010 and the start of activities of the which was developed with support from the Operational Programme Research and Development for Innovation. The main mission of the CENAKVA on the scientific map of the Czech Republic and Europe is to share and provide our unique infrastructure to partners in the Czech Republic, Europe and worldwide.
