Study Master in Fishery and Protection of Waters with Us

Offering a comprehensive exploration of biological, ecological, and technological topics, the Fishery and Protection of Waters study programme uniquely intertwines the realms of fishery and water protection. From specialized fish farming, reproduction, and breeding to protecting water resources, promoting biodiversity, and tackling aquatic contamination, our students gain a holistic understanding of all these inseparable domains. The European perspective on freshwater aquaculture and water management adds global dimension to the otherwise locally oriented industry. This program is ideal for graduates from related bachelor's fields, encouraging a diverse community of students to contribute their unique perspectives to the study of fishery and water protection.

About Faculty of Fisheries and Protection of Waters

Part of the University of South Bohemia in České Budějovice, the Faculty of Fisheries and Protection of Waters provides cutting edge education and research in fresh water ecology and aquaculture in a European context.
