

## Research Infrastructure for the Educational Purposes at the FFPW USB

<b>Project name</b>	<b>Research Infrastructure for the Educational Purposes at the FFPW USB</b>
<b>Registration number</b>	CZ.02.1.01/0.0/0.0/16_017/0002614
<b>Realization date</b>	6/2017 – 5/2022
<b>Recipient</b>	University of South Bohemia in České Budějovice
<b>Grant program</b>	OP - EU Operational Programme
<b>Responsible solver</b>	Assoc. Prof. Dipl.-Ing. Vladimír Žlábek, Ph.D.

### PROJECT ANNOTATION

The project aims to provide modern infrastructure for teaching related to research and innovation, i.e., for the needs of research-oriented study programs - to provide:

- \* instrumentation and laboratory equipment for research-oriented study programs and
- \* sufficient support equipment necessary for the quality of research-oriented study programs.

### PROJECT GOALS

The aim of the project is to support and accelerate the innovation and modernization of the project-oriented research-related fields through the provision of instrumentation and laboratory equipment (including additional support equipment). The project fulfills the specific objectives of the challenge, namely to improve the infrastructure for research and training purposes. These activities and their implementation are described in detail in the annexes to the project

application. The project and its activities have a common goal, which is to enhance significantly the quality of the modernization of the doctoral courses of Fisheries and Protection of aquatic ecosystems in co-operation with the synergic project of the RCDSA. The main objective of the project is therefore the high quality and efficient innovation / modernization of two research-oriented study programs in accordance with the university strategy and in line with current and future trends in aquaculture research and development, namely fisheries - Zootechnics and accreditation of the study program "Protection of aquatic ecosystems" within the framework of the doctoral study program Ecology and Environmental Protection. The aim of the project is to make this innovation both qualitatively and in terms of content beyond the local context and therefore it is necessary to implement the innovation tax in English as well.

Another objective is to involve practitioners and foreign experts in the creation of these study programs in connection with the acquired equipment, project facilities. This will in particular be the transfer of the requirements of practice to the profile of the graduate of the innovated study so that the student is as desired and practicable on the labor market as also with regard to the qualification towards modern methods of using the relevant equipment.

## PROJECT BUDGET

	Amount	Percentage (in%)
<b>Total budget</b>	91 573 194,00 CZK	100
<b>The amount of the grant</b>	77 837 214,90 CZK	85
<b>The amount of public funding</b>	9 157 319,40 CZK	10
<b>Own co-financing</b>	4 578 659,70 CZK	5
